

AIMA DIGITAL ASSETS CONFERENCE 2025

POST CONFERENCE REPORT

2025 RECAP

AIMA's 4th annual Digital Assets Conference continued a tradition of success, thanks to the support of our sponsors, speakers and broader membership. The conference sold out once again - bringing together over 300 of the industry's leading managers, investors, and experts. It has established itself as the must-attend event for those operating at the intersection of institutional asset management and crypto.

I was honored to host this conference once again, welcoming delegates in person to New York on April 24th for a

full day of insightful discussions on the evolving digital assets landscape with a high level of energy and engagement. The event builds on the critical year-round and global work of the AIMA Digital Assets Working Group (DAWG), which continues to serve as the voice for the alternative investment management industry within the digital assets space.

Our agenda focused on the how of institutional investment in digital assets, featuring plenary panel talks alongside deep-dive breakouts. The format was designed to encourage meaningful connections and collaboration among peers from around the world.

We thank all who joined us this year and look forward to welcoming you again in 2026.

Warm regards,
Michelle Noyes, Head of Americas
